

Presented by Miyah Jordan

CUSTOMER CANCELLATION ANALYSIS

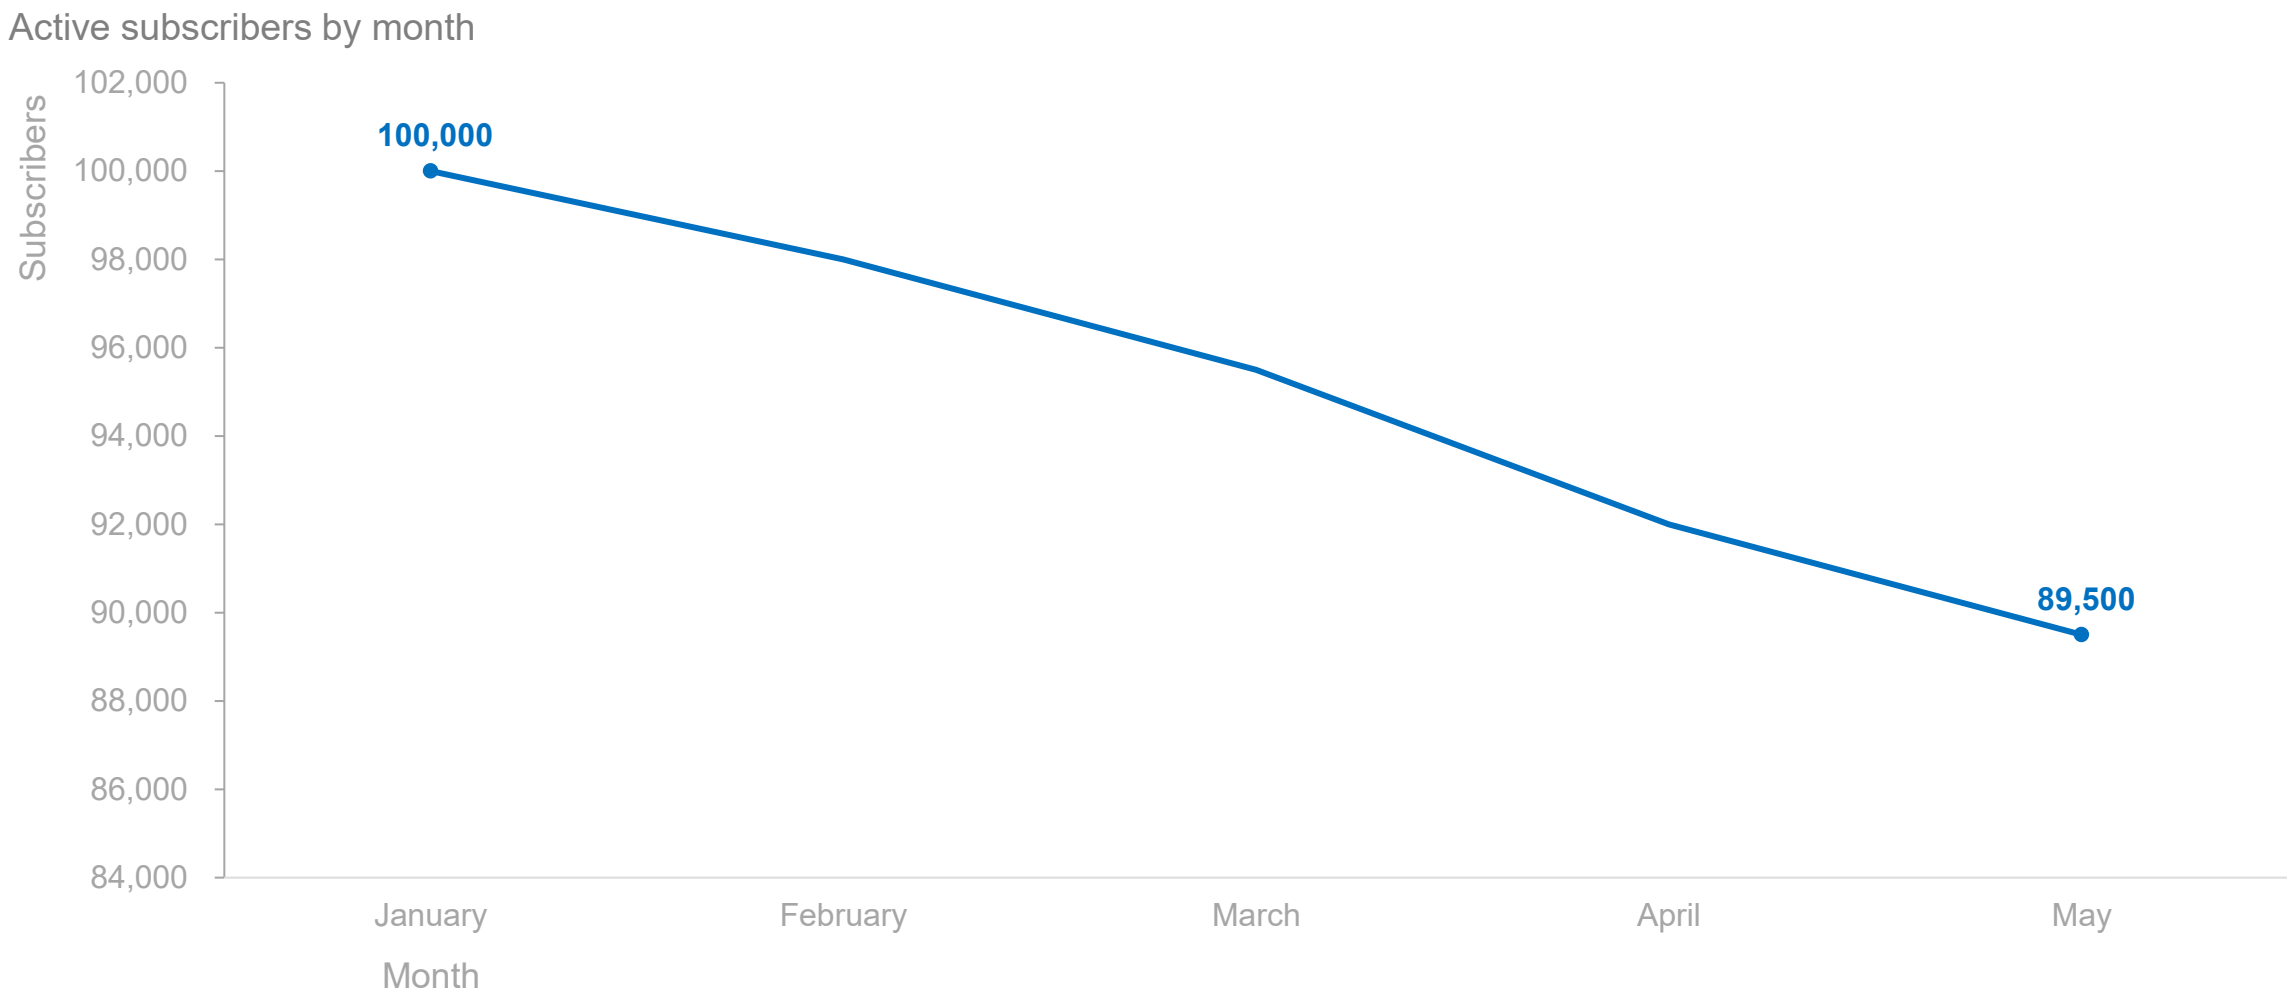

In this presentation...

THE GOAL:

1. Understand **why customers are cancelling their subscriptions.**
2. Use this knowledge to **reduce cancellations and re-engage users.**

We will end with a **specific recommendation.**

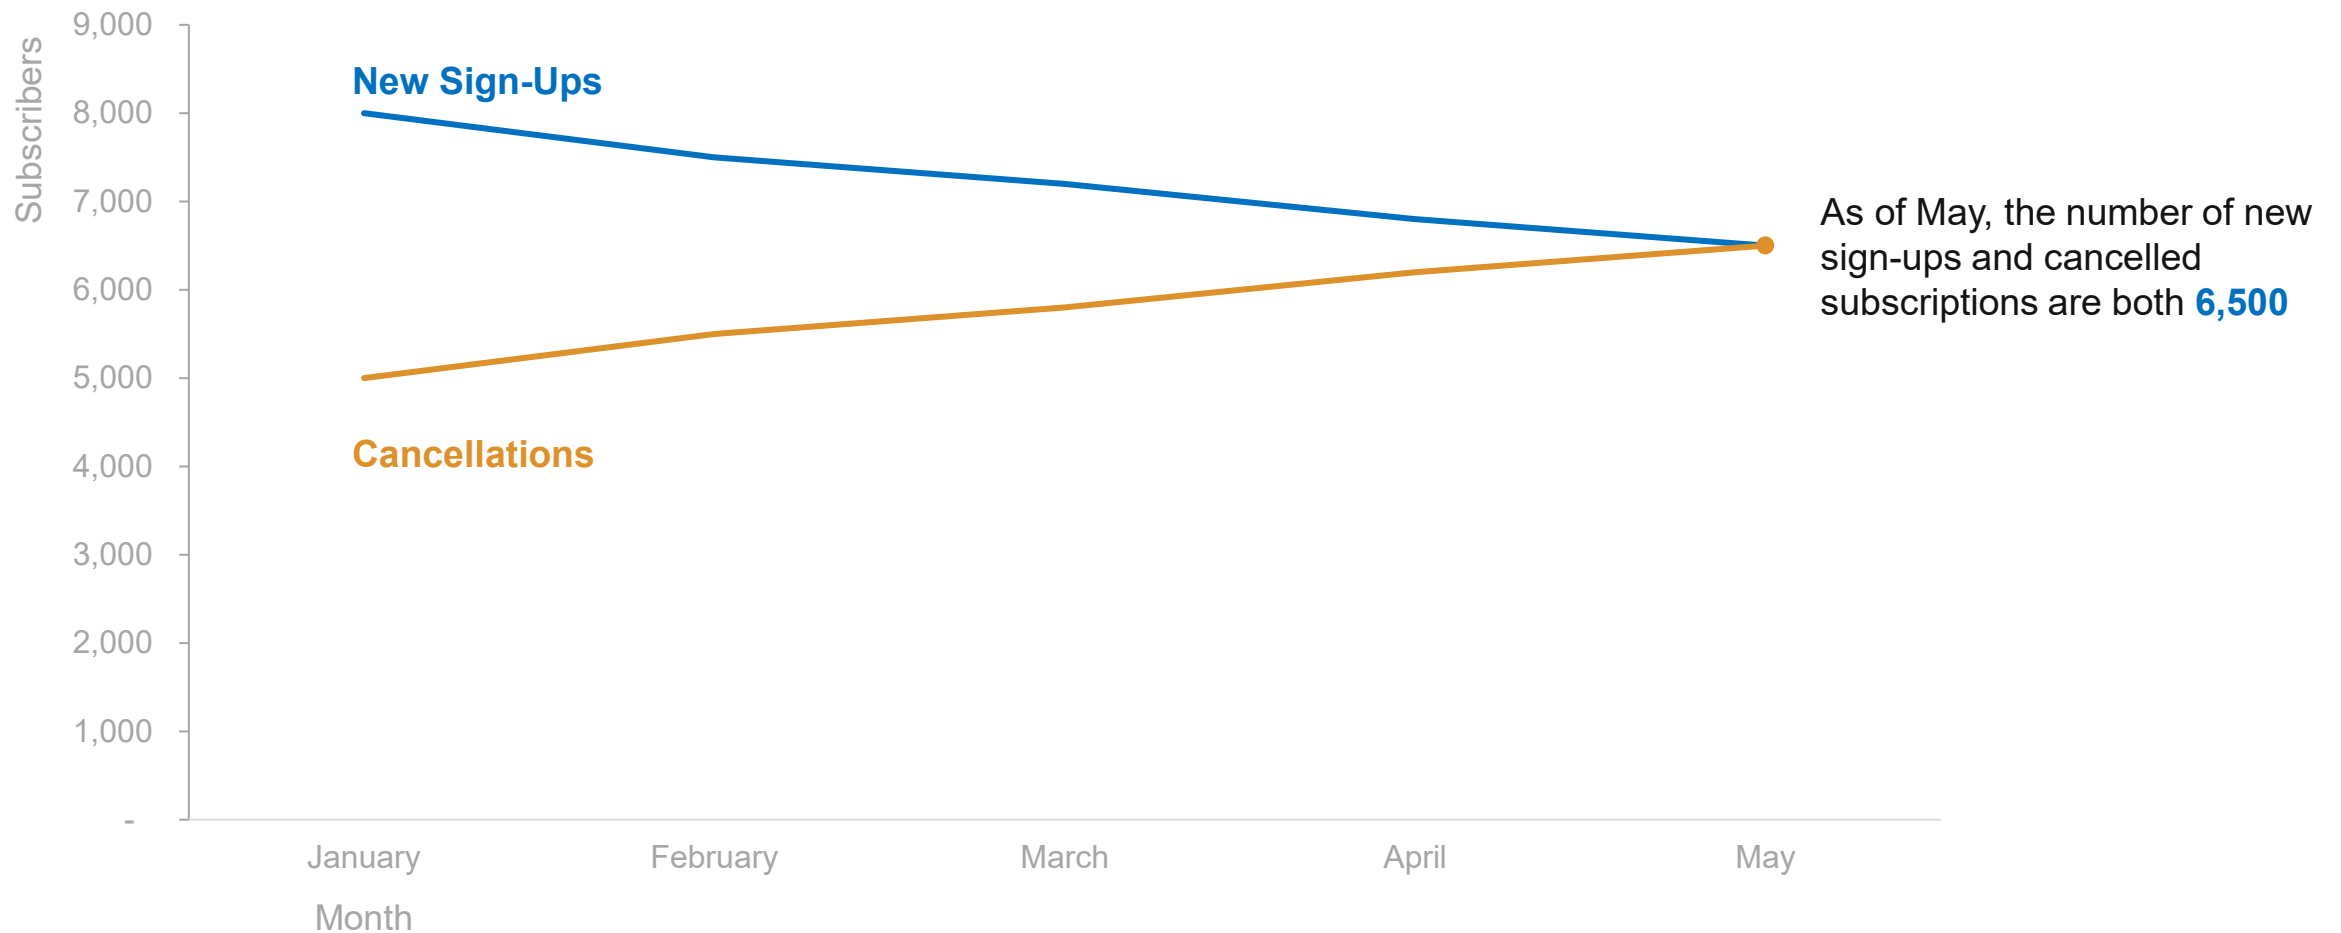

10,500 users have cancelled their subscriptions over 5 months

Data source: Dataset Streaming Service.

The rate of new signs ups per month are now **equal to** cancellations per month

New sign-ups vs. cancellations per month

Data source: Dataset Streaming Service. For analysis, “new sign-ups” are defined as new users who signed up that month.

As of May, the daily app crash rate is

5%

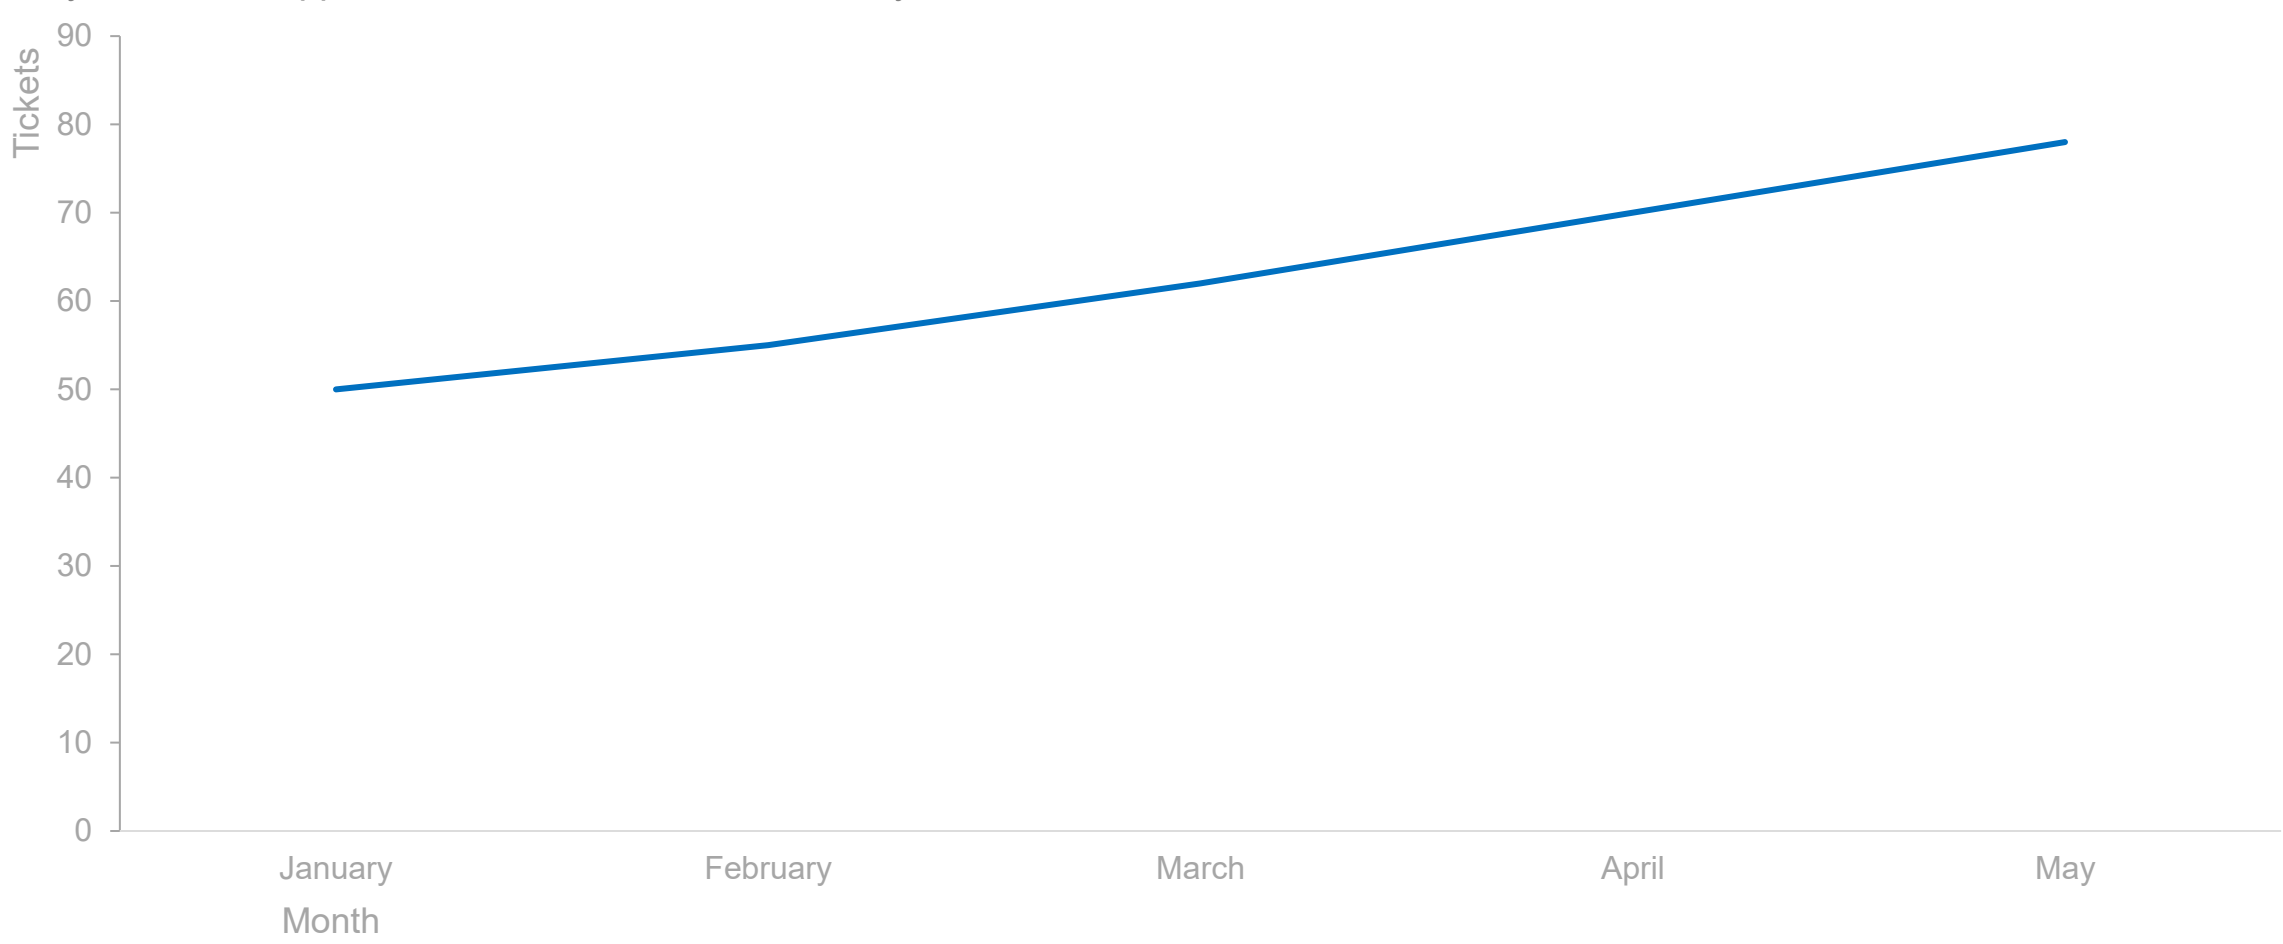

which is a **3% increase** since January.

Approximately **4,475** active users are affected each day.

Data source: Dataset Streaming Service.

Poor app performance **negatively impacts** customer experience

Daily customer support tickets submitted since January

Data source: Dataset Streaming Service.

Users **prefer feature Y** over feature X.

Usage of feature X decreased by

10%

While use of feature Y increased by

9%.

Data source: Dataset Streaming Service.

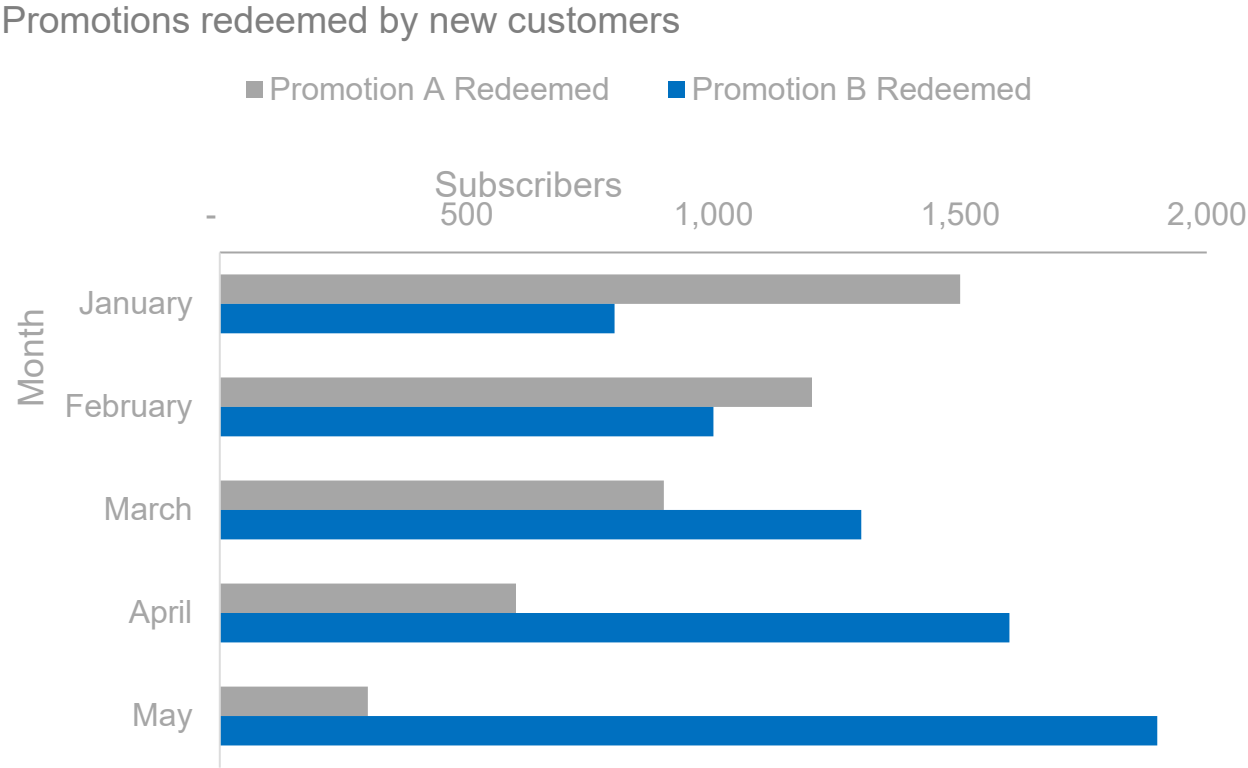

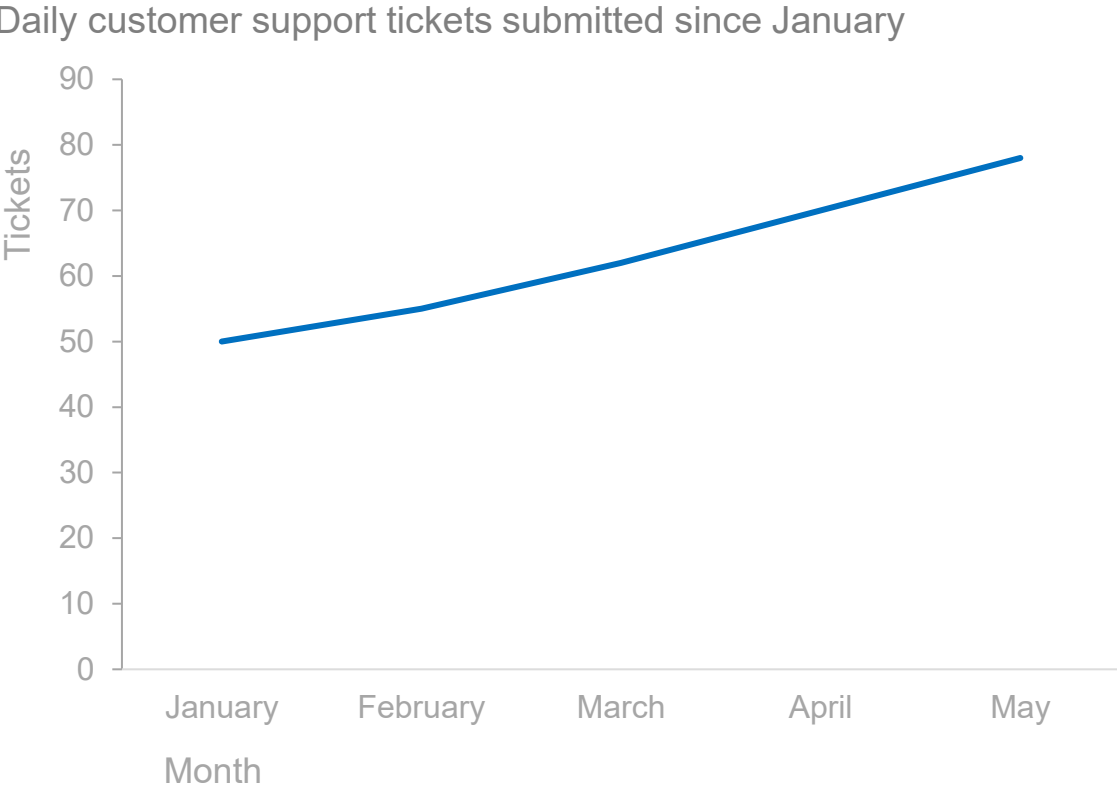

New users prefer to redeem promotion B over promotion A

Promotions redeemed by new customers

Data source: Dataset Streaming Service.

To prevent further customer churn, I recommend that you focus on app crash rates, and promote subscription option B

Data source: Dataset Streaming Service.

THANK YOU
